Hein Zaw Htet

www.iamhein.com

I'm a software engineer with a passion for well-crafted design. After 7 years of experience in web technologies, in late 2017, I changed my focus entirely to ReactJS, React Native & Javascript. I've never been happier with my choice of React.

EXPERIENCES

Freelance

(2014-2018)

- Developing Android, iOS and web applications with React Native for MyLann. All of these 3 platforms are based on a single code base. Releasing in August
- Designed and developed an official website with ReactJs and PHP for Sarpaylawka, one of the biggest book distributors & sellers in Myanmar
- Designed and developed an unofficial Yangon Bus application as a side project with React Native.
- Worked with multiple clients

Web Developer at Myanmar Links

(2011-2014)

- Worked with other developers to build internal knowledge-based system for Ooredoo Myanmar's customer champions (Call center staffs)
- Worked with other developers to build Zawgyi Mart
- Worked with other developers to build the first version of Open Myanmar Initiative
- Worked with multiple clients
